Mushrush Corn.

Heavy Trains Bring Large Crowds of Visitors.

To raise corn that takes only forty ears to make one bushel is quite a feat, but it has been accomplished this year by E. P. Marple, who lives near the Boys' State Industrial school, northwest of Topeka. Four ears are or disclay in the Shownes State bank. on display in the Shawnee State bank, weighing seven pounds. On the larg-est ear of corn there are 992 grains. Usually it takes from one hundred to one hundred and twenty ears of corn to make one bushel. The variety is known as the Mushrush.
